Question Format: Multiple Choice

Question: What portion of the ocean is the most productive?

Answer W: Continental shelf
Answer X: Continental slope
Answer Y: Abyssal plain
Answer Z: Ocean trench

Correct: W

Question Type: Bonus
Category: Biology
Question Format: Multiple Choice

Question: What defines the photic zone?

Answer W: Area where there is no photosynthesis
Answer X: Area where photosynthesis occurs
Answer Y: Area where animals are found
Answer Z: Area down to 6,000m

Correct: X

Question Type: Toss up
Category: Geology
Question Format: Multiple Choice

Question: Where is crust destroyed?

Answer W: Divergent boundaries
Answer X: Subduction Zones
Answer Y: In ocean trenches
Answer Z: In intertidal zones

Correct: X

Question Type: Bonus
Category: Geology
Question Format: Multiple Choice

Question: Where does the continental slope begin?

Answer W: Where the ocean meets the land
Answer X: Below 6,000m
Answer Y: At the shelf break
Answer Z: Where the abyssal plain ends

Correct: Y

Question Type: Toss up
Category: Geology
Question Format: Multiple Choice

Question: Which of the following is not associated with divergent plate boundaries?

Answer W: Mid ocean ridges
Answer X: Volcanoes
Answer Y: Sea floor spreading
Answer Z: Deep sea trenches

Correct: Z

Question Type: Bonus
Category: Geology
Question Format: Multiple Choice

Question: The Hawaiian Islands were formed by what oceanic feature?

Answer W: Ocean trench
Answer X: Mid ocean ridge
Answer Y: Subduction zone
Answer Z: Hot spot

Correct: Z

Question Type: Toss up
Category: Geology
Question Format: Multiple Choice

Question: What type of plate boundary is formed when two plates move past each other?

Answer W: Divergent boundaries
Answer X: Convergent boundaries
Answer Y: Transform boundaries
Answer Z: Subduction zones

Correct: Y

Question Type: Bonus
Category: Geology
Question Format: Multiple Choice

Question: The movement of one plate under another plate is termed?

Answer W: Subduction
Answer X: Sea floor spreading
Answer Y: Convection
Answer Z: Accretion

Correct: W

Question Type: Toss up
Category: Biology
Question Format: Multiple Choice

Question: What is the term used for organisms living in the upper 200m of the ocean?

Answer W: Epipelgaic
Answer X: Mesoplegaic
Answer Y: Bathyplegaic

Answer Z: Benthic

Correct: W

Question Type: Bonus

Category: Geology

Question Format: Multiple Choice

Question: Which of the following is an example of a transform plate boundary?

Answer W: Nazca and South American Plate

Answer X: Pacific and North American Plate

Answer Y: North American and Eurasian Plate

Answer Z: South American and African Plate

Correct: X

Question Type: Toss up

Category: Geology

Question Format: Multiple Choice

Question: Where is oceanic crust created?

Answer W: Divergent boundaries

Answer X: Subduction Zones

Answer Y: In ocean trenches

Answer Z: Convergent boundaries

Correct: W

Question Type: Bonus

Category: Geology

Question Format: Multiple Choice

Question: The Aleutian Islands were formed by what type of plate boundary?

Answer W: Convergent

Answer X: Divergent
Answer Y: Transform
Answer Z: Hot Spot

Correct: W
